

A photograph of an outdoor lounge area. In the foreground, a light-colored wooden armchair with a slatted back and light-colored cushions sits on a gravel path. Next to it is a matching round side table with a glass of water and a pen. The background features a stone wall, dense green foliage, and a view of the ocean under a clear blue sky. The scene is framed by the branches of a large tree on the left and top right.

SOL SINTERED™ STONE

NOVA

Nova Collection is an expertly crafted, monolithic design in SOL Sintered™ Stone, elegantly encasing an invisible aluminum frame.

- Dual fuel enabled (professional installation required for natural gas)
- Propane tank sits within the frame
- Manual lit ignition
- 55,000 – 100,000 BTUs depending on model selected
- Adjustable flame height
- Automatic safety shut off
- Includes matching SOL Sintered™ Stone Burner Cover

Kaya's Padded SOL Weave Wicker Collection features woven-in cushions crafted inside the wicker frame with Quick Dry Foam, an industry-leading reticulated foam. This fast-draining material accelerates drying time after rainfall, providing both comfort and convenience without the need for additional fabric-covered cushions.

CUSHION INFORMATION

↑ \$ EXTRA CHARGE

BACK & SEAT CUSHIONS

HOLLOW FILL WRAPPED BY DACRON

Bag is made of nonwoven polypropylene fabric (not waterproof)

TREATED FABRIC

Cushions constructed from water-resistant fabrics such as Sunbrella® RAIN, Crypton®, or similar materials require special construction to ensure durability and prevent mold or mildew buildup. These cushions must include a sling vent panel for air circulation.

SLING VENT PANEL

BACK CUSHION WITH VENTING

SEAT CUSHION WITH VENTING

Open zipper and place cushion upright, zipper-sided down to accelerate draining

↑ \$ QUICK DRY FOAM

Quick Dry Foam is the industry-leading reticulated foam. Its open pore construction allows any water which penetrates the outer fabric cushion casing to quickly flow through the foam.

STANDARD FOAM

This water-resistant cushion core will absorb water once it penetrates the outer fabric cushion casing, and it allows water to drain through at a slow pace. It will air dry and it is treated to inhibit mould or mildew growth.

2.2 density rating = Firmer

DACRON WRAP

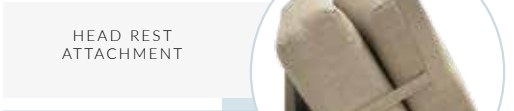

1.8 high density rated premium foam

↑ \$ SERGING

Serging is an overlock stitch requiring a special machine, and is sewn overtop of a conventional seam, providing an added level of reinforcement to the cushion seam.

PERGOLA ALUMINUM

PERGOLA

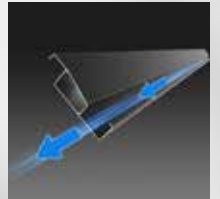

Shelter...but make it fashion. Transform the performance of your outdoor space with our contemporary aluminum **Pergolas**, featuring 4000K LED low voltage interior perimeter lighting & a remote-controlled, motorized louvered roof. Optional add-on features include aluminum slat walls and retractable screens. Enjoy sun, shade & rain protection to enhance & extend your time spent outdoors! Ideal for restaurant patios, rooftop amenity spaces, or as a serene haven for your own backyard.

FINISHES

SOL SINTERED™

SOL SINTERED™ STONE

SOL SINTERED™

SOL SINTERED™

SOL SINTERED™

SOL Sintered™ Stone tables, benches and fire pit tops or frames are crafted from natural, recycled materials using mineral by-products from the stone industry, including marble and granite. SOL Sintered™ Stone is a cutting-edge, non-porous natural stone ideal for outdoor use. It resists impact, chips, scratches (Mohs rating 6 on the mineral hardness scale), fire, frost, UV, chemicals and stains. Food safe, eco-friendly, and easy to clean, it combines beauty with high performance.

ALUMINUM

CABANACOAST® uses only premium heavy-gauge aluminum, known for its excellent weight-to-strength ratio. Aluminum is a lightweight yet durable metal, highly resistant to corrosion, making it perfect for outdoor furniture. Each piece is carefully constructed with precision welds and reinforced stress points, with finishing touches done by hand to ensure smooth and seamless joints.

All CABANACOAST® aluminum frames are coated with an electrostatically applied, baked-on powder coat finish, which far surpasses other types of paint finishes. A triple application of a weather-resistant, UV-inhibiting topcoat is applied to all our aluminum

POWDER-COAT PAINT

furniture. CABANACOAST® uses only North American, industry-leading Akzo Nobel®, Sherwin-Williams® and Tiger Drylac® commercial paints.

Our painted aluminum products are 100% recyclable.

FINISHES

SOL TEAK™

SOL TEAK™

SOL TEAK™

SOL TEAK™

SOL Teak™ looks and feels remarkably like real teak wood. Its frames are constructed from virgin Marine Grade Polymer (MGP), which is extruded under high pressure to withstand harsh weather conditions while maintaining its natural appearance. Like real teak, SOL Teak™ is dense and weighty, making it an excellent choice for windy locations such as rooftop decks.

Umber Natural Weathered Mica

The grain runs throughout the entire frame thickness, and each joint is bolted together with stainless steel hardware and reinforced with a specialized exterior adhesive. Unlike real teak wood, which requires regular cleaning, sanding, and oiling, SOL Teak™ is virtually maintenance-free and performs well in saltwater environments. Additionally, SOL Teak™ is UV-rated for up to 2,000 hours.

SOL WEAVE™ RESIN WICKER

Hazel Willow Reef Drift Teak Flat Espresso Flat Kona Black Ebony

Our proprietary resin wicker brand, **SOL Weave®**, is composed of durable, weatherproof resin fibres, which are individually dyed so that each wicker strand is unique in colour and texture variation. Ongoing manufacturing innovations and size, texture, colour and weaving technique of the wicker strands allow for many varied design styles, including some that simulate rope.

SOL Weave® is hand-woven by skilled craftspeople onto a durable, powder-coated aluminum frame, and all our aluminum and SOL Weave® wicker products are 100% recyclable. SOL Weave® resin wicker is UV rated for 3,000 hours.

FINISHES

SOL ROPE™

SOL Rope™ is specifically designed and engineered for outdoor use and is a material that has migrated from the boating industry to outdoor furniture. It is weather-resistant, UV-resistant, marine grade, and environmentally friendly.
